

GEODOME

Uniview PROGRAM STARTUP and NAVIGATION PANES

The **Uniview** Program navigates and controls the GeoDome. To open the Uniview Program, select the following on the desktop:

1. START

2. PROGRAMS

3. UNIVIEW 1.3

4. START

- Uniview will take several minutes to load

After Uniview Loads, several navigation panes will open on the desktop:

Uniview Theater

- Shows your presentation on the desktop as you project on the GeoDome
- Bookmarks can be found or made here

Object Tree

- Click on the +
Use to open, fly to, or jump to

Time Control

- Simulation speed adjustments

Custom Events

- Use to add/remove clouds, select night or day sky, stars

Geoscope - Earth

Camera

- orbit
- free flight
- surface

Uniview Input

- Left mouse click - move around, back and forth, up and down
- Right mouse click - zoom in and out

* Click and Drag these navigation panes to a comfortable location on your desktop so that you can be comfortable while running the presentation.
